

It took years to grow your business....

DONT LET ONE HARD DRIVE

CRASH TAKE IT ALL AWAY

Automate your business backups with TedanTek and MozyPro

The key to your business is the information and data you generate. Don't put yourself at risk of hard drive crash, virus, or a lost or stolen laptop. Protect what's most important with MozyPro online backup.

With MozyPro, you'll never worry about losing data again. It's simple, automatic, and secure and runs automatically in the background, backing up all of your business critical information to a secure data centre offsite.

Contact us for a demo and to find out just how easy it is to back up to the cloud.

Find out how TedanTek in partnership with Mozy can benefit your business backup needs today and in the future.

MozyPro Secure Online Backup for Businesses

Affordable, easy-to-use backup for multi-user and server environments

mozypro Online backup made simple

As a business professional, you know the importance of keeping your company data, financial records, and administrative materials safe. You don't have time for backup solutions that take months to set up, require thousands of pounds in hardware costs, and force you to hire someone to oversee it all.

TedanTek in partnership with Mozy, the trusted leader in online backup, will save you time and money with a simple, secure, and affordable backup solution for your computers and servers.

You can be up and running in no time with TedanTek's managed service offering or alternatively utilise existing skills in house as Mozy gives you the flexibility to deploy and manage multi-user environments from the convenience of a single administrative console.

Secure

Encryption: All user data is encrypted locally with military-grade encryption prior to transfer via a 128-bit SSL connection. You can choose a managed encryption key or a personal key for added security.

Data centers: All data centres employ state-of-the-art security, meet SAS70 standards, are ISO 27001 certified, and where applicable, adhere to European Union Safe Harbor Privacy Principles.

Near continuous data protection: Mozy automatically detects and backs up new and changed files. Schedule your backups daily or use automated backup schedules to keep your data backed up throughout the day.

Reports: Set up and run reports that allow you to easily monitor the backup health of your PCs, Laptops and Servers, report daily, weekly or monthly.

Platform and file support

Version (snapshot) support: Restore file versions up to 30 days in the past.

SQL, Exchange, and network drive support: Mozy backs up common business applications running on Windows servers.

Windows and Mac support: MozyPro supports Windows 7, 2008, Vista, XP, 2003, & 2000 (including servers) and Mac OS X 10.6, 10.5, & 10.4 (including servers).

Open and locked file support: MozyPro backs up all open and locked files, including Outlook PST files.

Easy to use

Automatic or scheduled backups: Tell MozyPro when to perform your backups. Automatic is the simplest method in which backups are performed while your computer is not in use. Scheduled backups can be performed daily or weekly at a specified time of day.

Block-level incremental backups: After the initial backup, Mozy only backs up new or changed portions of files, which saves bandwidth and ensures future backups are lightning fast.

Bandwidth throttling: Users can determine how much bandwidth they want to dedicate to their backups so other high-priority services can run unimpeded.

Multiple restore options: Users and administrators can restore data via the Mozy software client, through the web, or by ordering a DVD restore. Windows users can also restore data via right-click or through the Mozy Virtual Drive.

Local backup with Mozy 2xProtect™: Windows users can now back up locally to an external device as well as online to Mozy data centers for double protection.

Improved for Mac: Mozy 2.0 for Mac offers a clean new interface with simple-to-use backup and restore, better file scanning, and a smoother configuration experience.

The MozyPro advantage

Simple

Manage multi-user and server environments from the convenience of a web-based administrative console.

Secure

Mozy employs the highest security standards and stores your data in world-class data centres.

Affordable

Secure backup solutions start at less than £5 per month, with no setup fees, no hardware to purchase, and little to no management required.
